TITLES AND KEYWORDS

A
absorption 627
activity coefficient 329
adaptive control 421
Adaptive fuzzy inference system and its application in modelling and model based control, Abonyi, J., Nagy, L. and Szeifert, F. 281
aerated reactor 291
agglomerates 342
air entrainment 159
air injection 385
air-water flow 159
alcohol-water 329
ammonia-sodium thiocyanate mixture 663
An experimental and numerical investigation of heat transfer fouling and fluid flow in flat plate heat exchangers, Kho, T. and Müller-Steinhagen, H. 124
An experimental study of individual air bubble entrainment at a planar plunging jet, Cummings, P.D. and Chanson, H. 159
Analysis of fixed bed reactors using a diffuse interface single pellett model, Khan, A.R. and Bowen, J.H. 47
annular gas/liquid flow 713
aspect ratio 303
Assessment of an eddy-interaction model and its refinements using predictions of droplet deposition in a wave-plate demister, Wang, Yi and James, P.W. 692
Assessment of condensation curves in the design of binary vapour condensers, Webb, D.R., Dell, A.J., Stevenson, R.W. and Ax, K. 117
asymmetric blades 728
axial dispersion 16
axial dispersion model 212
axial hydrofoils and dual-Intermig impellers 241
axial Peclet number 16

azeotropic mixtures 487
azeotropic separation 469

B
baffled tubes 671
BASF 175
batch distillation 469
batch extractive distillation 588
batch scheduling 271
bin-packing 271
binder 342
blending 241
bubble breakage 159
bubble columns 303
bubble size distribution 535
bulk and particulate properties 21

C
calcium oxide 62
Calculation of two-phase pressure drop for vertical upflow in narrow passages by means of a flow pattern specific model, Holt, A.J., Azzopardi, B.J. and Biddulph, M.W. 7
capacitance imaging 699
capacity 583
capillary flow 206
carbon dioxide 62
catalyst pellets 55
Catalyst wetting in trickle-flow reactors. A phenomenological model, Iliuta, I., Larachi, F. and Grandjean, B.P.A. 759
catalytic distillation column 16
CFD simulations of sieve tray hydrodynamics, Krishna, R., van Baten, J.M., Ellenberger, J., Higler, A.P. and Taylor, R. 639
CFX4 189
chemical batch scheduling 271
clear liquid height 639
coal liquid fractions 248
coating 39
column tray 554
comb-blade impeller 104
Comparative study of two flow conditioners and their efficacy to reduce asymmetric swirling flow effects on orifice meter performance, A, Ouazzane, A.K. and Barigou, M. 747
Comparing impeller performance for solid-suspension in the transitional flow regime with Newtonian fluids, Ibrahim, S. and Nienow, A.W. 721
Comparison of mass transfer performance for various single and twin impellers, Chen, Z.D. and Chen, J.J.J. 104
compartment model 291
Compartment model approach: mixing in large scale aerated reactors with multiple impellers, Vrábel, P., Van der Lans, R.G.J.M., Cui, Y.Q. and Luyben, K.Ch.A.M. 291
complexing agents 218
computational fluid dynamics 124, 189, 554, 639
Computational fluid-dynamics and experimental verification of two- phase two-dimensional flow on a sieve column tray, Yu, K.T., Yuan, X.G., You, X.Y. and Liu, C.J. 554
computed tomography 511
concave blade turbine 728
concave-blade impeller 104
condenser behaviour 110
condenser design 117
conduction 131
contact efficiency 151
contactor 699
Continuous synthesis of TiO_2 fine particles and increase of particle size using a two-stage slug flow tubular reactor, Kubo, M. and Yonemoto, T. 335
control 543
controllability analysis 357, 597
Controlled maldistribution studies on structured packing, Fitz Jr, C.W., King, D.W. and Kunesh, J.G. 482
cooling 131
cooling curves 117
Correlations for prediction of mass transfer coefficients in single drop systems and liquid-liquid extraction columns, Kumar, A. and Hartland, S. 372
Coupling of an absorption-refrigerator with a co-generation system, The, Le Goff, P. and Hornut, J.M. 663
cross-linking 318
Crossflow membrane filtration enhanced by an external DC electric field: A review, Huotari, H.M., Trägårdh, G. and Huisman, I.H. 461
crude oil 769
CVD 39
cylindrical curvilinear grids 429

D
debottlenecking 493, 619
design 138
design efficiencies 493
Development of an improved method to quantify maldistribution and its effect on structured packing column performance, Edwards, D.P., Krishnamurthy, K.R. and Potthoff, R.W. 656
Development of a microreactor for chemical production, Burns, J.R. and Ramshaw, C. 206
Development of a new generation of structured packings for distillation, Billingham, J.F. and Lockett, M.J. 583
diameter effect 505
diffuse double layer 764
diffusion 325, 647
diffusional interactions 561
dimensional analysis 89
discharge coefficient 747
discrimination 138
dispersion 318, 699
distance 138
distillation 475, 482, 487, 519, 543, 554, 561, 583, 609, 619, 656
distillation boundaries 561
Distillation composition profiles - what do they tell us?, Zuiderweg, F.J. 475
disturbance propagation models 253
downer 151
drop 89
droplet deposition 692
droplet motion 692
drying agent absorbent 342
dust collection 223
dynamic matrix control 413, 421
Dynamic modelling of reactive absorption with the Maxwell-Stefan approach, Scheider, R., Kenig, E.Y. and Górak, A. 633
dynamic simulation 633
Dynamics and control of falling film evaporators with mechanical vapour recompression, Winchester, J.A. and Marsh, C. 357

E
eddy-interaction model 692
Effect of column diameter on pressure drop of a corrugated sheet structured packing, Olujic, Z. 505
Effect of surfactant on foam and froth properties, The, Darton R.C. and Sun, K.-H. 535
effective diffusivity 55
Effective diffusivity measurements on porous catalyst pellets at elevated temperature and pressure, Hou, K., Fowles, M. and Hughes, R. 55
Effects of oscillatory flow and bulk flow components on residence time distribution in baffled tube reactors, The, Stonestreet, P. and van der Veeken, P.M.J. 671
efficiency 609
electrochemical method 69
electrochemical reactor 212
Electrodialytic remediation of soil polluted with heavy metals. Key parameters for optimization of the process, Hansen, H.K., Ottosen, L.M., Hansen, L., Kliem, B.K., Villumsen, A. and Bech-Nielsen, G. 218
electrodialytic soil remediation 218
electrofiltration 461
electrolytes 633
emulsion 685
Energetic analysis of the liquid-to-wall mass transfer in a trickle bed reactor, Latifi, M.A., Naderifar, A. and Midoux, N. 69
energetic correlations 69
energy storage 663
entrance region 151
equilibrium-based 519

Estimation of diffusion coefficients in dilute liquid mixtures, Bosma, J.C. and Wesselingh, J.A. 325
evaporation rates 189
extraction 699
extraction columns 372
extraction paths 647
extractive distillation 469

F
fabric filtration 223
falling film evaporator 357
fibre membranes 395
filter cleaning dynamics 223
fine particle 39
fittings 685
fixed bed 47
flooding 583
flooding point 498
flow 685
flow conditioning 747
flow measurement 747
flow patterns 721
flow simulation 318
flow and temperature distribution 124
flow visualization 241
fluidized bed 62
flyash 764
foam 535
fouling 461, 769
fouling patterns 124
fouling resistances 769
fractional feed charge 588
free volume 325
FRI data 493
froth 535
froth density 639
froth height 639
fuzzy modelling 281
fuzzy relational models 421

G
gas cleaning 223
gas dispersion impellers 728
gas separation 395
gas-liquid contact area 567
gas-liquid mixing 709
gas-liquid systems 619
gas-solid 47
Gas-solids contact efficiency in the entrance region of a co-current downflow fluidized bed (downer), Zhu, J.-X., Ma, Y. and Zhang, H. 151
gas/liquid flow 7

H
heat-integration 597
heating 131
heavy metals 218
high interaction regimes 69
high solids concentration 241
history 175
hold-up profiles 303
homogenization 741
horizontal annular flow 713
hybrid compression-absorption heat pumps 663
hybrid modelling 519
Hybrid modelling approach for separation systems involving distillation, A, Schenk, M. Gani, R., Bogle, D. and Pistikopoulos, E.N. 519
hydrocyclone flow 429
hydrodynamics 151, 627
Hydrodynamics and mass transfer of textile vibrating-valve trays, Mustafa, H., Békássy-Molnar, E. and Elhamouz, A. 627
hydrofoil 731
hydrogenation 567

I
Imaging immiscible liquid-liquid systems by capacitance tomography, Bolton, G.T., Korchinsky, W.J. and Waterfall, R.C. 699
immiscible condensates 110
impellers 721
improved oil recovery 385
inception 159
industrial design 110
industrial-scale experiments 117
Influence of hydraulic conditions on separation efficiency of Optiflow, Spiegel, L. and Knoche, M. 609
Influence of mass transfer in distillation of mixtures with a distillation boundary, Baur, R., Taylor, R. Krishna, R. and Copati, J.A. 561
integrated design and control 597
Interaction between design and control of a heat-integrated distillation system with prefractionator, Bildea, C.S. and Dimian, A.C. 597
Interpretation of fouling data in industrial shell and tube heat exchangers, Takemoto, T., Crittenden, B.D. and Kolaczkowski, S.T. 769
Investigation of liquid maldistribution in packed columns by X-Ray tomography, Marchot, P., Toye, D., Crine, M., Pelsser, A-M. and L'Homme, G. 511

J
jet mixing 754
Jet trajectories of transverse mixers at arbitrary angle in turbulent tube flow, Forney, L.J., Feng, Z. and Wang, X. 754
Joint optimization and machine learning method for a selection and grouping problem, A, Kirschner, K.J. and Realff, M.J. 271

K
kneading 318

L
LDA 731
leaching 764
least-squares fitting method 16
light crude oil 385
limiting current density 218
liquid distribution 511, 656
liquid holdup 498
liquid phase resistance 475
liquid-liquid 699
liquid-liquid extraction 647
liquid-liquid flow 206
loading point 498
Loss coefficients for flow of surfactant-stabilized emulsions through pipe components, Pal, R. and Hwang, C.-Y.J. 685
low temperature oxidation 385

M
maldistribution 475, 482
maldistribution factor 511
Manipulation of bulk reactions in multiphase systems by the use of microheterogeneous media, Patel, S. and Mehra, A. 97
Marangoni 535
mass exchanger networks 253
mass transfer 89, 104, 498, 567, 627, 647, 764
mass transfer coefficients 372, 498
Mass transport and residence time characteristics of an oscillatory flow electrochemical reactor, Carpenter, N.G. and Roberts, E.P.L. 212
mathematical model 47, 335
Maxwell-Stefan equations 633
Maxwell-Stefan theory 561
Measurement of gas hold-up profiles by gamma ray tomography: effect of sparger design and height of dispersion in bubble columns, Parasu Veera, U. and Joshi, J.B. 303
mechanical vapour recompression 357
Mellapak 482
membrane filtration 461
microchannel 206
microengineering 206
microreactor 206
MILP 271
mixing 151, 291, 318, 709

Mixing hydrodynamics in a double planetary mixer, Tanguy, P.A., Thibault, F., Dubois, C. and Ait-Kadi, A. 318
model based control 281
model identification 281
Model selection for a multiresponse system, Singh, S. 138
modelling 395, 429, 779
Modelling media movement during cleaning of pulse-jet fabric filters, Allen, R.W.K., Goyder, H.G.D. and Morris, K. 223
Modelling the split of horizontal annular flow at a T-junction, Azzopardi, B.J. and Rea, S. 713
Modification to the equilibrium model for condensation of vapours of immiscible liquids, A, Webb, D.R. and Kim, J.S. 110
modules 395
More operable fully thermally coupled distillation column configurations for multicomponent distillation, Agrawal, R. 543
Morphology of spray-dried particles. The effect of process variables upon the morphology of spray-dried particles, The, Walton, D.E. and Mumford, C.J. 442
moving bed 39
MTBE 613
Multi-stage modelling of a semi-batch polymerization reactor using artificial neural networks, Yang, S.H., Chung, P.W.H. and Brooks, B.W. 779
Multicomponent effects in liquid-liquid extraction, Haeberl, M. and Blass, E. 647
multiperiod optimization 588
multiple impellers 291
Murphree efficiencies 561
MVG tray 493
MVG™ tray at FRI, The, Nutter, D.E. 493

N
narrow passages 7
Nature of chemical research, The, Cussler, E.L. 3
neural network 779
New, ultracapacity tray for distillation columns, A, Fair, J.R., Trutna, W.R. and Seibert, A.F. 619
nitration 206
non-catalytic 47
numerical simulation 692
Numerical simulation of hydrocyclones, A, He, P., Salcudean, M. and Gartshore, I.S. 429

O
On detecting mixing pathologies inside a stirred vessel using electrical resistance tomography, Holden, P.J., Wang, M., Mann, R., Dickin, F.J. and Edwards, R.B. 709
On the relation between ideal and real systems in ternary distillation, Vogelpohl, A. 487
On the trailing vortices around hydrofoil impeller blades, Fentiman, N.J., Lee, K.C., Paul, G.R. and Yianneskis, M. 731
On-line learning fuzzy relational model based dynamic matrix control of an openloop unstable process, Demircan, M., Çamurdan, M.C. and Postlethwaite, B.E. 421
operability 543
Optiflow 609
Optimal operation of moving-bed reactor for CVD coating of fine particles, Golman, B. and Shinohara, K. 39
Optimization of batch extractive distillation processes for separating close boiling and azeotropic mixtures, Mujtaba, I.M. 588
Optimization of solvent feed rate for maximum recovery of high purity top product in batch extractive distillation, Milani, S.M. 469
orifice meter 747
oscillatory flow 212, 671
Oxidation kinetics of North Sea light crude oils at reservoir temperature, Ren, S.R., Greaves, M. and Rathbone, R.R. 385
oxygen 405

P
packed bed 511
packings 498
particle 89
particle morphology 21
perforated spargers 303
performance 131
Performance of a gas dispersion impeller with vertically asymmetric blades, Myers, K.J., Thomas, A.J., Bakker, A. and Reeder, M.F. 728
Performance of structured packings in trickle-bed reactors, The, Frank, M.J.W., Kuipers, J.A.M., Versteeg, G.F. and Van Swaaij, W.P.M. 567
permeance 395
pervaporation 231
petroleum fractions 248
pH 218
phase split 713
phenomenological modelling 759
pipeline 754
planetary 318
plate design 124
plate heat exchangers 124
plate-and-frame modules 231
plunging jet 159
polymerization 413
polymerization reactor 779
porosity 342
Predicting the effect of dissolved salt on the vapour-liquid equilibria for alcohol-water-salt systems, Chou, T.-J. and Tanioka, A. 329
prediction 248
Prediction of mass transfer columns with dumped and arranged packings. Updated summary of the calculation method of Billet and Schultes, Billet, R. and Schultes, M. 498
pressure drop 7, 498, 505
pressure loss 685
pressure swing adsorption 405
probability distribution 138
process conditions 442
process control 357
process design 231, 253
process dynamics 357
process engineering 175
Process intensification in spray dryers by turbulence enhancement, Southwell, D.B., Langrish, T.A.G. and Fletcher, D.F. 189
Process and product engineering. Achievements, present and future challenges, Wintermantel, K. 175
process synthesis 253
process tomography 709
product engineering 175
profiled blade impeller 731

R
radial dispersion 511
rate-based 519
rate-based approached 633
reaction model 385
reactive absorption 633
reactive azeotropes 613
Reactive azeotropes in kinetically controlled reactive distillation, Frey, Th. and Stichlmair, J. 613
reactive distillation 519, 613
regenerator 131
reservoir simulation 385
residence time distribution 212, 671
residue curves 561
retro-fitting 619
Rushton turbine 728

S
salt 329
saturation 647
scale-up 505
semi-batch process 779
separation 62
Separation characteristics of ternary gas mixtures in serial cells of polysulfone hollow fibre membranes, Ettouney, H.M., El-Dessouky, H.T. and Abou Waar, W. 395
separation efficiency 429
separation lines 487
separation systems 519
sequential 138
shell and tube heat exchangers 769
sieve trays 493, 639

similarity 131
Simple thermal conductivity-temperature correlation for undefined petroleum and coal liquid fractions, A, Aboul-Seoud, A. and Moharam, H.M. 248
simulation 231
Simulation and process design of pervaporation plate-and-frame modules to recover organic compounds from waste water, Lipnizki, F. and Field, R.W. 231
single droplet drying behaviour 442
single drops 372
Single particles, bubbles and drops: Their velocities and mass transfer coefficients, Wesselingh, J.A. and Bollen, A.M. 89
slug flow 335
solid circulation 62
solid concentration profiles 741
solid dispersion 741
Solid particles concentraction profiles in an agitated vessel, Sessiecq, P., Mier, P., Gruy, F. and Cournil, M. 741
solid propellant 318
solid suspension 721
Solid-liquid mass transfer during leaching of calcium from dilute slurries of flyash, Iyer, R.S., Stanmore, B.R. and Pullammanappallil, P.C. 764
solid-liquid mixing 709
solids suspension 241
solvent recovery 588
sour gas purification 633
sparger design 303
Spherical zeolite-binder agglomerates, Sulaymon, A.H. and Mahdi, A.S. 342
Spray dried products - characterization of particle morphology, Walton, D.E. and Mumford, C.J. 21
spray drying 21, 442
steam reforming 55
stirred vessel 709, 731, 741
Stokes-Einstein 325
structured packing 482, 505, 567, 583, 609, 656
Study on catalytic distillation processes part IV: Axial dispersion of liquid in catalyst bed of catalytic distillation column, Xu, X., Zhao, Z. and Tian, S. 16
Study of heat transfer process in a regenerator, Muralikrishna, S. 131
Study and modelling of the vacuum swing adsorption (VSA) process employed in the production of oxygen, Budner, Z., Dula, J., Podstawa, W. and Gawdzik, A. 405
surfactant 535
Suspension and liquid homogenization in high solids concentration stirred chemical reactors, Bujalski, W., Takenaka, K., Paolini, S., Jahoda, M., Paglianti, A., Takahashi, K., Nienow, A.W. and Etchells, A.W. 241
swirl 747

T
T-junction 754
T-junction modelling 713
TAME 613
temperature 413
Temperature control of a batch polymerization reactor, Yüce, S., Hasaltun, A., Erdoğan, S. and Alpbaz, M. 413
temperature effect 248
ternary separation 597
thermal conductivity 248
thermally coupled system 543
titanium dioxide 335
tomography 303, 699
trailing vortices 731
transitional flow 721
trays 619
trickle bed reactor 69, 567
trickle beds 759
trickle flow 511
turbidimetry 741
turbulence 731, 747
turbulent flow 429
Twin fluid-bed reactor for removal of CO_2 from combustion processes, A, Shimizu, T., Hirama, T., Hosoda, H., Kitano, K., Inagaki, M. and Tejima, K. 62
twin-impeller 104
two-stage 335

U
Unified model for the prediction of structural disturbance propagation in mass exchanger networks, A, Yang, Y.H., Yan, Q.Z. and Huang, Y.L. 253

V
validation 189
valve 685
valve trays 627
vapour distribution 656
vapour-liquid equilibria 329
velocity 89
velocity profile 747
vibrating-valve trays 627
viscous fluid 318

W
wall mass transfer 69
waste reprocessing 271
waste water treatment 231
wave-plate demister 692
wetting efficiency 759
Wilson model 329

Z
zeolites 342
Zwietering equation 721
